VISIONWEB AND VERSASUITE ANNOUNCE ORDERING INTEGRATION WITH PRACTICE MANAGEMENT SOFTWARE

VersaSuite Users Can Now Seamlessly Order Spectacle Lenses from VisionWeb-Connected Laboratories

Austin, TX – February 8, 2010 - VisionWeb, the premier provider of technology services to streamline the eyecare practice, and VersaSuite, a leader in the Electronic Health Record and Practice Management healthcare market, announced today the launch of the integration that will enable VersaSuite customers to order spectacle lenses from all VisionWeb-connected laboratories from within the VersaSuite Practice Management software environment. The integration will reduce duplicate data entry and streamline the ordering process for VersaSuite customers.

Eyecare providers using the integration will benefit from accurate, convenient online spectacle lens ordering, with the ability to track the status of orders at any time, from within the environment of their practice management system. In addition, orders placed through the VisionWeb are received by the lab sooner and are automatically put into process, providing the customer with heightened efficiency and improved turnaround time.

Rodney Brown, Director of Sales and Marketing at VersaSuite had this to say about the integration, "We see this as another important step in VersaSuite's ability to provide our current and future clients the most robust and efficient solution in the industry." "VisionWeb is the leader in spectacle ordering and we're excited about the possibilities of this partnership."

VersaSuite customers are encouraged to contact VersaSuite at (800) 903-8774 or visit www.versasuite.com to learn more and request the VisionWeb ordering integration.

VersaSuite, in addition to the other practice management systems integrated with VisionWeb's ordering service, is listed on the VisionWeb site, located at www.visionweb.com, under the Technology Partners heading. On this page, visitors can learn more about the features and benefits of ordering through the VisionWeb integration and download a brochure.

ABOUT VISIONWEB

Headquartered in Austin, Texas, VisionWeb is the online service to help eyecare providers and laboratories simplify and streamline their businesses. VisionWeb offers online multi-payer insurance transaction processing; convenient and direct-to-supplier online ordering and tracking; one-stop access to ophthalmic clinical news and information, and other benefits for opticians, optometrists, ophthalmologists, optical manufacturers, laboratories, distributors, and patients. For more information, please visit www.visionweb.com.

ABOUT VERSASUITE

VersaSuite specializes in the development of integrated health care software solutions for both clinical and hospital environments. A comprehensive practice-management ensemble, VersaSuite is a symphony of several vertically-oriented modules: The healthcare modules perform clinical and management tasks for all medical specialties within in-patient and out-patient care settings. The business modules automate employee scheduling, client tracking & invoicing, payroll processing, human resources management, and employee time-tracking & scheduling. With cutting-edge technology and marketplace insight, VersaSuite offers a complete integrated clinical and management solution designed to help any healthcare organization to provide exceptional patient care and achieve optimal competitive efficiency. For more information, please visit www.versasuite.com.
