

General Overview

VersaSuite is a seamlessly integrated suite of healthcare modules that fully automates the most demanding inpatient and outpatient healthcare enterprises.

- **Comprehensive Modules Automate Hospitals from Admissions-Discharge**
 - ⇒ Seamlessly integrated in one framework: EHR, HIS, EPM, RCM, PACS, CPOE, EMAR, EDIS, LIS, RIS, OR, pharmacy, accounting, ERP suite
- **EHR Supports All Medical Disciplines**
 - ⇒ Behavioral health, cardiology, dentistry, dermatology, ENT, general medicine, internal medicine, OB/GYN, oncology, ophthalmology, pediatrics, radiology, sleep medicine, surgery, and more
- **N-tier Scalable Heterogeneous Inpatient and Outpatient Implementations**
 - ⇒ Effortlessly change between inpatient and outpatient modes
 - ⇒ N-tier architecture scales from small clinics to large hospital chains
- **Business Intelligence and Data Analytics**
 - ⇒ Real-time monitoring of productions, collections, A/R, re-admit rates, staff performance, and more
 - ⇒ Outcomes-based reporting
 - ⇒ Over 120 built-in reports, including A/R, HR, EHR, and inventory
- **Health Information Exchange (HIE) Platform**
 - ⇒ Exchange health information electronically with other organizations
- **Device Integration and Interoperability**
 - ⇒ DICOM, IHE, HL7 compliant, including CCD & CCR import/export
- **Cloud Based Remote Hosting or Local Deployment**
- **HIPAA 5010 and ICD 10 Compliant**

Revenue Cycle Management

VersaSuite provides fully integrated insurance claims processing for Institutional, Professional, Vision, and Dental plans. DME (Durable Medical Equipment) is supported via a robust inventory and material handling system that is fully integrated with the billing and claims process.

RIS/PACS

VersaSuite's Radiology Information System/ Picture Archiving Communication System (RIS/PACS) provides physicians with robust tools for fast navigation, viewing, and annotation so that doctors can provide the best possible care. VersaSuite-RIS/PACS is fully DICOM compliant to ensure the best image viewing experience and instrument integration.

Flexible CPOE

VersaSuite's Computerized Physician Order Entry (CPOE) system allows physicians to quickly find and review comprehensive order sets. With just a few clicks, physicians can order dozens of medications, labs, and tests. VersaSuite-CPOE provides an intuitive and detailed care grid per patient for nurses.

Auto-EM Coding

Many physicians under code as a preventative measure against audits. VersaSuite delivers automatic E/M coding that follows coding guidelines exactly to generate the highest possible coding level, boosting revenues for many exams and procedures.

Extensive Reporting

VersaSuite features over 120 reports to help hospital administrators monitor every aspect of the enterprise: financial, inventory, insurance, HR, and more. VersaSuite also allows users to create custom reports.

Powerful Business Intelligence

Gain unprecedented insight into your data through our real-time event-driven analytics engine. Monitor re-admit patterns, key performance indicators, and outcomes. Our metrics will help your organization achieve substantial savings through improved efficiency and effectiveness.

Resource-Based Scheduler

The resource-based scheduler (RBS) allows hospitals to schedule by any resource — diagnostic equipment, tools, staff, or any other resource — so that the scheduler matches the clinical workflow. The RBS also makes it possible to schedule complex procedures that involve dozens of different types of resources in just a handful of clicks.

Intuitive and easy-to-use EHR

VersaSuite's specialty-agnostic EHR makes it incredibly easy for healthcare professionals of any medical discipline to enter and review clinical data easily and when they need it. VersaSuite's EHR is fast, flexible, and designed with the end user in mind at all times on any device—tablets and iPads included.

EMAR

VersaSuite EMAR interfaces with barcode readers so that nurses can quickly scan medications to ensure proper medication delivery. Our EMAR checks to ensure patients' 5 rights - right patient, right medication, right dosage, right time, and right route.

Enterprise-Strength Solution

VersaSuite features an n-tier service-oriented architecture that allows thousands of users to access the database simultaneously from any number of locations. VersaSuite can even enable secure access from a patient's home.
