VersaSuite™
Adaptative HIS / EHR / EMP / ERP Solution

THE COMPLETE HEALTHCARE SOFTWARE SOLUTION

REVENUE CYCLE MANAGEMENT

VersaSuite provides fully integrated insurance claims processing for institutional, professional, vision, and dental plans. DME (Durable Medical Equipment) is supported via a robust inventory and material handling system that meshes seamlessly with the billing and claims process.

RIS/PACS

VersaSuite's Radiology Information System/ Picture Archiving Communication System provides physicians with robust tools for fast navigation, viewing, and annotation, so doctors can provide the best possible care. VersaSuite RIS/PACS is fully DICOM compliant to ensure the best image viewing experience and easy instrument integration.

FLEXIBLE CPOE

VersaSuite's Computerized Physician Order Entry (CPOE) system allows physicians to quickly find and review comprehensive order sets. With just a few clicks, physicians can order dozens of medications, labs, and tests. VersaSuite-CPOE provides an intuitive and detailed care grid per patient for nurses.

AUTO-EM CODING

Many physicians undercode as a preventative measure against audits. VersaSuite delivers automatic E/M coding that follows exact coding guidelines to generate the highest possible coding level, boosting revenues for many exams and procedures.

EXTENSIVE REPORTING

VersaSuite features over 160 reports to help office managers and administrators monitor every aspect of the enterprise: financial, inventory, insurance, HR, and more. VersaSuite also gives clients the ability to create their own reports, or clients can ask VersaSuite to help them create custom reports.

POWERFUL BUSINESS INTELLIGENCE

Gain unprecedented insight into your data through our real-time event-driven analytics engine. Monitor re-admit patterns, key performance indicators, and outcomes. Our metrics will help your organization achieve substantial savings through improved efficiency and effectiveness.

RESOURCE-BASED SCHEDULER

The resource-based scheduler (RBS) allows hospitals to schedule by any resource — diagnostic equipment, tools, staff, or any other resource — so the scheduler matches the clinical workflow. The RBS also makes it possible to schedule complex procedures, involving dozens of different types of resources in just a handful of clicks.

INTUITIVE AND EASY-TO-USE EHR

VersaSuite's specialty-agnostic EHR solution makes it incredibly easy for healthcare professionals of any medical discipline to enter and review clinical data easily and when they need it. VersaSuite's EHR is fast, flexible, and scalable, and it's designed with the end user in mind at all times on any device.

EMAR

VersaSuite EMAR interfaces with barcode readers so nurses can quickly scan medications, ensuring proper medication delivery. Our EMAR checks to ensure patients' 5 rights — right patient, right medication, right dosage, right time, and right route.

ENTERPRISE-STRENGTH SOLUTION

VersaSuite features an N-tier service-oriented architecture, allowing thousands to access the database simultaneously from any number of locations. VersaSuite can even be set up to allow staff to securely access the central database from a patient's home.
